

I do not want any amendment to New Jersey Do NOT Call laws, as it has been an absolute necessity. Before this law was established my family was constantly harassed with marketing calls which were of no use to me except to constantly making me answer a telephone for no reason. If I want a product or a service, I am totally capable of getting any information needed. To change this law would be a travesty. It's one of the better things that has happened for the general public.
